TITLE	Career Placement and Graduate Transfer Report, 1999.
INSTITUTION	Community Coll. of Rhode Island, Warwick.
PUB DATE	2000-06-00
NOTE	62p.; Cover title varies.
PUB TYPE	Numerical/Quantitative Data (110) -- Reports - Descriptive (141)
EDRS PRICE	MF01/PC03 Plus Postage.
DESCRIPTORS	College Transfer Students; Community Colleges; Education Work Relationship; Graduate Surveys; Higher Education; *Job Placement; *Outcomes of Education; *Student Employment; *Transfer Rates (College)
IDENTIFIERS	*Community College of Rhode Island

ABSTRACT

The document presents the survey results on the employment and continuing status of the 1999 graduates of the Community College of Rhode Island (CCRI). The statistical breakdown reveals that 80.4 percent of the 1999 graduates are employed (48.7 percent full-time), 33.4 percent are continuing their education (11.9 percent full-time), and 4.8 percent continue to seek employment. Data about employment status, educational aspirations, and average salaries are provided for graduates in 27 fields. Of the 196 Business Administration graduates who responded, 108 (55.1%) indicated that they were employed full time. Business Administration graduates had an average annual salary of $29,420 ($14,352-$62,400 range). Among graduates of the Criminal Justice and Legal Studies Program who responded, 82 (61.7%) indicated full-time employment. The program meets the requirements established by many police departments, which mandate successful completion of 60 hours of college course work in law enforcement for consideration for employment. The Liberal Arts degree program is designed for students intending to transfer to baccalaureate degree programs following graduation from CCRI. Graduates transfer most often to Rhode Island College and the University of Rhode Island. Of the 251 graduates of the program who responded, 56 (22.3%) indicated "education full-time," 61 (24.3%) indicated "education full-time/employed part-time," and 71 (28.3%) indicated "employed full-time." Appendices are included. (JA)

CAREER PLACEMENT AND GRADUATE TRANSFER REPORT

1999

Community College of Rhode Island

"I am a retired airport manager and I thoroughly enjoyed my experience at CCRI. I enjoyed working toward my degree in business management so much that after graduation I enrolled in the paralegal degree program. I am trying to quench my thirst for knowledge."

Community College of Rhode Island does not discriminate in admissions, services or employment on the basis of sex, race, color, religion, national origin, ancestry, sexual orientation, age or handicap.

"CCRI has laid the foundation for my career as a paralegal. I initially attended CCRI because of the affordability, but found out that the greatest asset was gained through the excellent teaching staff. I received nothing less than the most professional education for a two-year institution. Thank you CCRI!

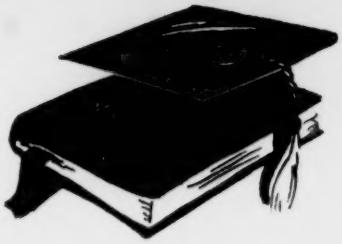
Aaron Carvalho
Providence, RI

A Message from the President

Students come to the Community College of Rhode Island for a variety of reasons. Increasingly, many students and their families are taking advantage of the fact that the most economical route to a baccalaureate degree is to start their program at CCRI. With a strong economy and a high demand for educational professionals in fields such as allied health and computer science, we also find that enrollment in those areas reflects the needs of the marketplace. Whatever the motivation, we believe that CCRI is a good place to start.

Community colleges are proud of their graduates because they do well as they move on to further higher education or to the public and private sectors in our communities. At CCRI, we have always felt that it is incumbent upon us to let you know what our recent graduates are doing. We believe that you will be impressed by this report and that you will share our pride in the success of the men and women, young and old, who have recently graduated from CCRI.

Edward J. Liston



"The Community College of Rhode Island properly prepared me for further education at a four-year college."

Kathleen M. McMahon
Warwick, RI

"Attending CCRI was the best decision I ever made. My life has improved and I enjoyed doing what I was trained for from CCRI."

John Ojih
Manville, RI

Preface

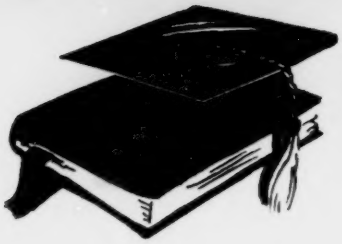
Each year, the Community College of Rhode Island conducts a study on the employment and continuing status of the previous year's graduates.

This year, a survey for the class of 1999 was distributed to 1421 graduates. A mailing and a follow-up telephone survey produced a total response rate of 82.3 percent. A sample questionnaire is provided in Appendix B.

Results from the survey indicate that, with small exception, 1999 graduates are employed and/or continuing their professional studies. The statistical breakdown reveals that 80.4 percent of the 1999 graduates are employed (48.7 percent full-time), 33.4 percent are continuing their education (11.9 percent full-time) and 4.8 percent continue to seek employment. Information comparing responses of graduates from the classes of 1997, 1998, and 1999 can be found in Appendix C.

Since the Report on Career Placement and Transfer of 1999 Graduates is based on a self-report survey, some caution in interpretation is suggested. The following information should provide further clarification of the data. Average salaries, based on a 40-hour week, are reported only for education-related employment and may show an unexpected broad range due to data collected from both graduates in entry-level positions and professionally employed graduates who attended CCRI for further professional development.

The overall results from this year's Placement and Transfer Report again validate, as did all reports since 1985, CCRI's success in preparing students for careers and for further education.

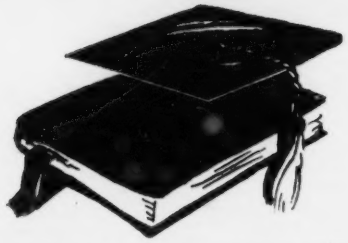


"CCRI prepared me for my transition to Roger Williams University and for my career as an investigator. I will definitely be ahead of my peers in law school with the knowledge I gained in the law enforcement program at CCRI."

Raymond R. McGinnis
Bristol, RI

SURVEY STATISTICS FOR CLASS OF 1999

1421	GRADUATES	
1169	RESPONDING	82.3%
569	Employed Full-Time	48.7%
108	Employed Full-Time/Education Part-Time	9.2%
119	Employed Part-Time	10.2%
34	Unavailable for Employment	2.9%
56	Unemployed and Searching	4.8%
139	Education Full-Time	11.9%
144	Education Full-Time/Employed Part-Time	12.3%



Business Administration

The Business Administration Program focuses on providing students with a solid academic background in business as well as specialized training in a variety of areas. Students receive a solid foundation in management, marketing, accounting, Retail Management, Finance/Banking, Entrepreneurship and Real Estate. They also learn critical thinking, problem solving and decision-making skills. A cooperative education option offers students an opportunity to gain work experience while in school.

Cardio-Respiratory Care

A respiratory care worker is an allied health specialist employed under medical supervision in the treatment, management, control, diagnostic evaluation and care of patients with deficiencies and abnormalities associated with the cardiopulmonary systems of the body. CCRI's two-year, six semester program incorporates college classes with clinical practice. Graduates must pass a national entry-level examination. Respiratory therapy personnel are employed in hospitals, nursing facilities, clinics, doctors' offices, home care companies, rehabilitation centers and municipal organizations.

1999 Graduates Of Program: 10

Chemical Technology

The Chemical Technology Program integrates experimentation, lecture and recitation materials to produce a unified presentation of analytical, inorganic, organic and industrial chemistries. It is designed for students who are more interested in the application of science than the mathematical descriptions of theoretical concepts. The program is accredited by the American Chemical Society. Graduates from the program find employment in areas ranging from aerospace and biochemistry to pollution control and zinc metallurgy.

1999 Graduates Of Program: 13

1	Roger Williams University	Chemistry

Clinical Laboratory Technology

(formerly Medical Laboratory Technology)

Clinical laboratory technicians perform all of the routine tests in an up-to-date medical laboratory. The technician is required to know specific techniques and instruments. The CLT Program is a two-year program that includes clinical training. At the end of this experience, students are eligible to take a certification examination to become licensed by the State of Rhode Island. Graduates work in private laboratories, doctors' office laboratories, hospital labs, research, sales and commercial laboratories.

Computer Studies

CCRI offers two Associate in Science degree programs in the computer area. The Computer Programming degree program prepares the student to enter a modern programming environment. It stresses problem definition and solution design using different programming languages in the development of applications. The Microcomputing degree program prepares the student to enter a workplace that emphasizes the use of the personal computer as a stand-alone device or in a networked computer environment. This program prepares an individual to be employed in computer user support services. The college also offers one year certificate options, which emphasize technical work only, for students who already hold a Bachelor's Degree or have two years of work experience in a computer-oriented profession. The career paths of graduates have been changing in recent years; instead of working in programming positions which typically lead to systems analysts positions at banks or insurance companies, students are going to work for major companies to man the "help desk."

Dental Assistant

The CCRI Dental Assisting Program is a one year program accredited by the American Dental Association's Commission on Dental Accreditation. The majority of dental assistants are employed by general dentists, providing chairside assistance. Additionally, some are employed in specialty practices such as orthodontics and oral surgery.

Electronics

The Electronics Technology Program trains individuals to be electronic repair and troubleshooting technicians. Students develop an understanding of both theoretical and practical applications of circuit design, construction and testing of systems. Graduates of the program generally enter the workforce as entry level technicians at companies such as Cherry Semiconductor, International Business Machines, Digital, Toray Industries, AT & T and Xerox.

Engineering

The Engineering Program is designed to provide a firm background in basic engineering principles. Students who successfully complete the program may transfer to a four-year institution or go directly into employment as an engineering assistant. The curriculum includes a strong foundation in mathematics, the basic sciences and engineering fundamentals, as well as liberal arts courses.

Engineering Technology

CCRI has two Engineering Technology Programs. The Electronic Engineering Technology Program educates students as technicians in the design, development and testing of engineering models and systems. Graduates of this program pursue careers as engineering associates, engineering aides in research and development, field engineers, sales engineers, engineering technicians, technical writers or assistant production managers in the electronics industry. Due to the increasing complexity of electrical and electronic equipment, many students decide to expand their knowledge by pursuing a four-year degree in engineering technology. The Mechanical Engineering Technology Program trains students to convert engineering theory into working plans in order to solve real world problems. The students study traditional engineering subjects such as physics, math, statics, materials and mechanisms as well as taking courses in the areas of robotics, tool design, quality control, CAD, production planning and cost estimating. Graduates are qualified to seek employment in the design as well as the manufacturing or industrial engineering areas.

The Computer Engineering Technology Program offers students a chance to acquire heavier concentration in computer education. Computer engineering technicians are needed to assist engineers in the design, development and testing of new devices, and they are needed to install, operate and maintain computer equipment. In industry they may be found in design, in sales, in research and development, or in the field providing technical information and service to the users of computer engineering technology.

The Telecommunications Engineering Technology Certificate is designed for individuals who already have a basic knowledge of mathematics and circuit theory. Telecommunications technologies are needed to plan, install and maintain state-of-the-art telephone systems, cable TV and computer networks. Although technologies have knowledge of theoretical topics, they tend to focus on solving practical design and application problems.

Fine Arts

CCRI offers the Associate in Fine Arts degree in Art, Jazz Studies, Music and Theatre. These programs serve both students transferring to a four-year college or professional school and students who wish to pursue a career. They provide hands-on experience in the first two years of higher education, a strong foundation in the humanities, exposure to interdisciplinary study. CCRI offers the only Jazz Studies program in Rhode Island and the only theatre program which offers jazz, ballet and modern dance. Students in the theatre program develop skills and creativity in the areas of acting, musical theatre, technical theatre and communications. Visual arts students focus on ceramics, computer technology, graphic design, and photography. Music students may concentrate on performance, teaching, communications, composition or the music business.

Human Services

Human service workers perform in a variety of educational and therapeutic settings with individuals, groups and families. Students receive an education which combines competency-based training specific to each education and social service concentration with supervised field work internships. Graduates may continue their education or enter the human service delivery system as child care and special needs professionals, social work case aides, assistant teachers, residential care providers and substance abuse counselors.

"CCRI was a step into the beginning of a new, dynamic life full of infinite opportunities."

Van V. Markle
Blackstone, MA

Liberal Arts

The Liberal Arts degree program is designed for students intending to transfer to baccalaureate degree programs following graduation from CCRI. It requires coursework in English composition including research writing, mathematics and laboratory sciences, history and the social sciences, and the fine arts and languages. Graduates transfer most often to Rhode Island College and the University of Rhode Island, although CCRI also has agreements with nearly 66 baccalaureate colleges and universities throughout New England. These agreements guarantee admission and junior year status to CCRI liberal arts graduates with satisfactory grades. These colleges include Bryant College, Salve Regina University, Roger Williams University, Boston University, U Mass/ Dartmouth, Stonehill College, Worcester State College and Suffolk University.

Machine Design

The Machine Design Program offers students practical skills in the detailing and design of mechanical components. Students receive instruction on both traditional drafting equipment and computer-aided drafting and design equipment. Graduates of the program generally accept positions as beginning detailers, advancing to designers. They may also transfer to Industrial Technology Programs at Northeastern University and Roger Williams University.

Nursing (Licensed Practical)

The Practical Nurse Program is part of the articulated nursing program. Once accepted into the program, students can complete the requirements for graduation within eleven months and are eligible for the licensing examination for practical nursing. Graduates of this program are quickly assimilated into the health care field and work in a variety of health care settings. As a graduate of this program, the licensed practical nurse may return within five years and complete the requirements necessary to receive an associate degree in science for registered nurse in one year.

Office Administration

The Office Administration programs are designed to emphasize a variety of computer tasks created by new technologies as well as traditional office tasks. With the shift of work responsibility from middle management, the role of the office professional has become critical. The department's programs have been developed to address changing workplace requirements. Program options include administrative assistant/secretary, legal administrative assistant/secretary and medical administrative assistant/secretary. Cooperative education experience is available to students.

Physical Therapist Assistant

The physical therapist assistant works under the supervision of the physical therapist to treat patients with physical disabilities resulting from disease, injury or other bodily conditions. Their duties include assisting the therapist in implementing treatment programs according to the plan of care established by the physical therapist, training patients in exercises and activities of daily living, conducting treatments using special equipment, administering modalities, and reporting patient responses to the physical therapist. The program is a two year program which includes 16 weeks of clinical experience. Passage of a licensure examination is required. Physical therapist assistants work in hospitals, clinics, rehabilitation facilities, long-term care facilities, extended care facilities, school camps and in patients' homes.

Process Control Technology

(formerly Instrumentation Technology)

The Process Control Technology Program is a study of the electronic, pneumatic or hydraulic instruments used in the field of process control. Students are trained to calibrate, maintain, repair and operate instruments used in process control systems such as power generation, chemical, pulp and paper, water and wastewater, and food and beverage systems. Graduates obtain jobs as process engineers/ technicians, instrument and control technicians, and test and evaluator technicians. This program is one of only two in New England.

Radiography

A radiographer is a person who uses x-radiation, a knowledge of anatomy, and imaging principles to aid physicians in the diagnosis of disease, in monitoring patient progress and in controlled screenings to help prevent disease. A radiographer works in hospitals, clinics, doctors' offices, and private emergency rooms. The profession offers numerous opportunities for advancement, including computed tomography and special procedures. With one year of additional education, there are opportunities in medical ultrasonography, nuclear medicine and radiation therapy.

Retail Management

The Retail Management Program is designed to prepare students for careers in mass merchandising or fashion merchandising. A major component of the program is the cooperative work experience in which students are employed in retail establishments throughout the state. Graduates obtain employment in department stores, specialty shops, chains, catalog showrooms, and off-price stores. Within each type of store there are career opportunities in merchandising, buying, management, sales promotion, human resources, loss prevention, real estate, operations, distribution, finance and accounting.

APPENDIX B

Class of 1999 Career Placement Survey

1. Which statement BEST describes your present situation (check one)

1. ___ Employed Full-Time
2. ___ Employed Full-Time & Educational Part-Time
3. ___ Employed Part-Time
4. ___ Unavailable for Employment
5. ___ Unemployed and searching for a job
6. ___ Education Full-Time
7. ___ Education Full-Time & Employed Part-Time

PLEASE ANSWER ONLY THOSE QUESTIONS THAT APPLY. (PLEASE PRINT)

2. If working, employed by: _____

   Current position: _____

3. Is this position related to your program of study at CCRI?
   YES___ NO_____

4. Do you think CCRI effectively prepared you for this position? YES___ NO_____

5. Salary:
   Hourly:_____ Weekly:_____ Yearly:_____

6. How many hours a week do you work?
   _____

7. Is this position in line with your career goals? YES___ NO_____

8. If you are continuing your education FULL -TIME, what school are you attending and what is your major?

   SCHOOL: _____
   MAJOR: _____

9. Do you think CCRI effectively prepared you for your studies? YES___ NO_____

Optional comments:
On the back of this survey, please add your observations on CCRI's effectiveness as an educational institution (include strengths and/or areas needing improvements).
